

Ancillary and behavioral health specialties

This list was created for the March 2020 *COVID-19 coverage guidelines* News article and the COVID-19 update to our telehealth payment policies: *Telehealth (Telemedicine) - Behavioral Health* and *Telehealth (Telemedicine) - Medical Services*.

If your provider specialty appears on this list:

- When you provide any telephonic services, do not bill the specific telephonic CPT codes. Bill all covered services that you render either by telehealth/video or telephone as if you are performing a face-to-face service using the codes that are currently on your fee schedule.
- You must use one of the following telehealth modifiers listed above (GT, 95, G0, and GQ) and type of service 02. This will enable us to pay you the same rate we pay you for in-person, face-to-face visits.

Acupuncturists
Ambulance (air, ground, service suppliers)
Alcohol drug treatment facilities
Ambulatory surgical center
Assisted reproductive technology providers
Audiologists
Board certified behavior analysts
Certified nurse-midwives
